

## Web Cookies

Web cookies are small text files that your browser saves on your computer, and they are necessary for the proper functioning and appropriate display of content on all devices. Cookies, for example, store your user settings, such as your preferred language, or can be used to store registration data on a website so that the user does not have to enter it again on the next visit.

In addition, cookies can store personal information, such as your name or email address, but it is important to note that this information can only be stored if you allow it. Our website does not have access to information you have not provided and cannot access other files on your computer.

ELTING d.o.o. uses standard web cookies primarily to enable a better user experience.

In addition to standard web cookies, we also use Google Analytics cookies. These cookies store information about how visitors use our websites, including the number of pages displayed, where visitors are coming from, and the number of visits, all to help us understand and improve the use of our websites and ensure a better user experience. The IP address we send to Google Analytics is anonymized so that it cannot be linked to you. More information about Google Analytics cookies can be found at the link <https://www.google.com/analytics/learn/privacy.html>.

Web cookies can be deleted by using the settings of your browser, and instructions on how to remove them can be found using the "Help" function in your browser or on the browser manufacturer's website.

Additional information about what web cookies are, what they are used for, and how to remove them from the most common browsers can be found at the link <https://www.aboutcookies.org.uk>.
